

AMN Healthcare EMR Staffing Solutions Custom Created for Your Facility

Making the transition or upgrade to an electronic medical records (EMR) system can bring improved efficiency and patient safety, plus financial incentives and several other benefits for your staff. Our dedicated team of EMR transition experts will work with you to assess your facility's specific needs, devise a plan, and provide the supplemental staff you'll need throughout the EMR transition process.

EMR EXPERIENCE

A DEDICATED EMR SOLUTIONS TEAM READY TO PARTNER WITH YOU

Our dedicated EMR solutions team has been helping facilities with their system installations and upgrades since 2005. With decades of experience, our team will partner with your implementation team to provide project management and on-site support in addition to EMR travel RNs that possess a unique combination of clinical and technical skills plus go-live experience.

DURING YOUR EMR IMPLEMENTATION, AMN WILL HELP YOU:

- Deliver high-quality care and maintain patient satisfaction scores
- Offset losses in efficiency (industry estimates average 15%) due to core staff's learning curve on new system
- Manage all supplemental EMR clinical staff, including nurses, allied professionals, physicians, and more
- Accelerate system adoption and reinforce compliance and charting processes
- Maintain morale and avoid EMR implementation-induced attrition and LOAs

CUSTOM EMR STAFFING STRATEGIES THAT PRIORITIZE YOUR GOALS

At AMN, we recognize that each facility's EMR conversion project is unique, which is why your staffing solution will be customized to your needs. Our goals for your success are:

- Minimal impact on clinical staff so you can maintain excellent patient care
- Keeping beds open to serve the patient community and avoid loss of revenue
- Rolling out one unit or your entire health system - in stages or all at once
- Improving technology adoption among your core staff
- Backfilling for core staff while they train on the new system
- Supporting core staff with additional 'go-live' system expertise
- Accessing the full spectrum of healthcare providers, including physicians, therapists, pharmacists, and RNs

PREPARATION IS KEY

The AMN team has the expertise to design and customize a staffing solution to fit your individual facility's needs. One way that we do this is by assessing the capacity of your current team and then planning and developing a roadmap 3-6 months out from implementation. In doing this, our team can help source and backfill your staff with trained, qualified, compliant, and cost-effective healthcare professionals.
